

# Installation Manual

Android Head Units

# Thank you

Thank you for purchasing our product  
We hope you love it as much as we do.

Please take the time to read these  
instructions before attempting installation.

If you need any help, we have experienced  
staff on hand to help you, so please don't  
hesitate to reach out via one of the options  
below.

# Warranty Terms

The warranty for this product is 2 years from the date of purchase, however, the warranty will be void if:

- The unit is tampered with, damaged, or modified.
- If applicable, reverse camera cable damaged/modified and/or subjected to overvoltage
- If applicable, the Navigation SD card is damaged/modified
- Installation of 3rd party apps that may cause harm to the unit.

## Warranty Terms

The Polaris Android Head Unit is covered for 2 years and includes:

- Defective Equipment • Defective Cables

## **Not Covered under warranty:**

- Abuse
- Improper installation
- Alteration to Cables and Plugs
- Accidents
- Water damage
- Improper use
- Labour
- Postage and Handling

# INSTALLATION NOTES

The installation of this unit requires technical skill and experience. If you do not have the level of skill necessary, please phone or email us so we can refer a recommended installer.

This unit is designed to be used in a vehicle with a 12-volt battery and a negative grounding. Before installing this unit to a recreational vehicle, bus, or truck, make sure the battery voltage is appropriate for this unit to be used.

To avoid short circuits in the electrical system, ensure that the negative battery cable is disconnected before installation.

Always secure all wirings with cable clamps or adhesive tape to prevent short circuits.

To avoid the possibility of shorting out the electrical circuit in the unit, never connect the battery wire directly to the vehicle battery.

Please make sure all wiring connections and speaker wires are well insulated.

When pulling the dash apart, please use quality trim tools to avoid damaging your dash.

Do not cut any plugs or make any alterations to any cables. Doing so will void your warranty. To read more about our warranty terms, see [page 3](#)

The wiring diagram applies to most Polaris Android in-dash head units.

# ACCESSORIES / PARTS

## ALL HEAD UNITS

### GPS Antenna

Mount the antenna on top of the dash with the black part facing the sky.

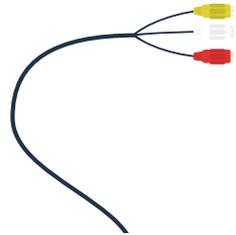

### Bluetooth Microphone

We recommend mounting on the pillar. Can remove foam if Bluetooth seems quiet.

### USB Cables

We recommend mounting into vehicle glove box, unless the unit comes with a USB retention cable

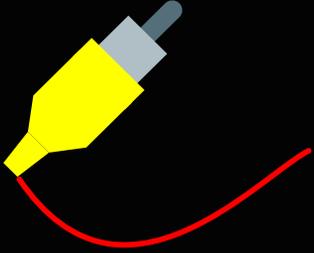

### Reverse and Front Camera Input

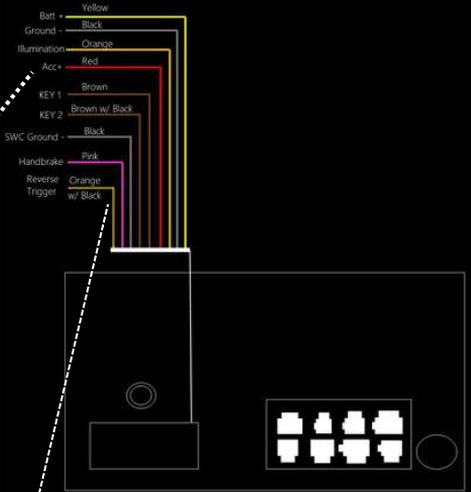

Do not pick up power for any camera from this cable.

# REVERSE CAMERA

Plug camera into CAM-IN

Connect red power  
(from camera cable) to  
RED Acc +

Connect the Reverse trigger wire to the  
reverse input in the factory plug.

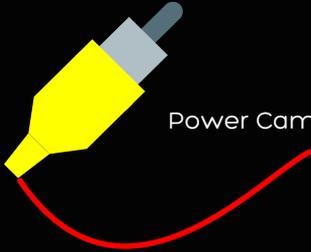

If your vehicle doesn't have a reverse power input feed, you will need to run the **reverse trigger wire** (orange w/ black stripe) to **Reverse Light +**. It is best to do this while running your camera cable at the same time.

The reverse trigger wire is what 'tells' the unit that the car is in reverse. Failure in wiring reverse trigger will result in the camera only appearing manually via the cam app.

Powering the camera via **Acc+ power**, you are allowing for full-time vision. If you don't want this, then you can simply power the camera via Reverse light +

# FRONT CAMERA / CARAVAN CAMERA

Plug camera into F-Cam

Power Camera to ACC+

View Camera via CAM  
App while driving

DO NOT pick up power for the F-CAM input from the camera plug itself.

## How to access caravan camera through F-CAM when in reverse gear

When car is in reverse  
reverse camera will  
always appear by default

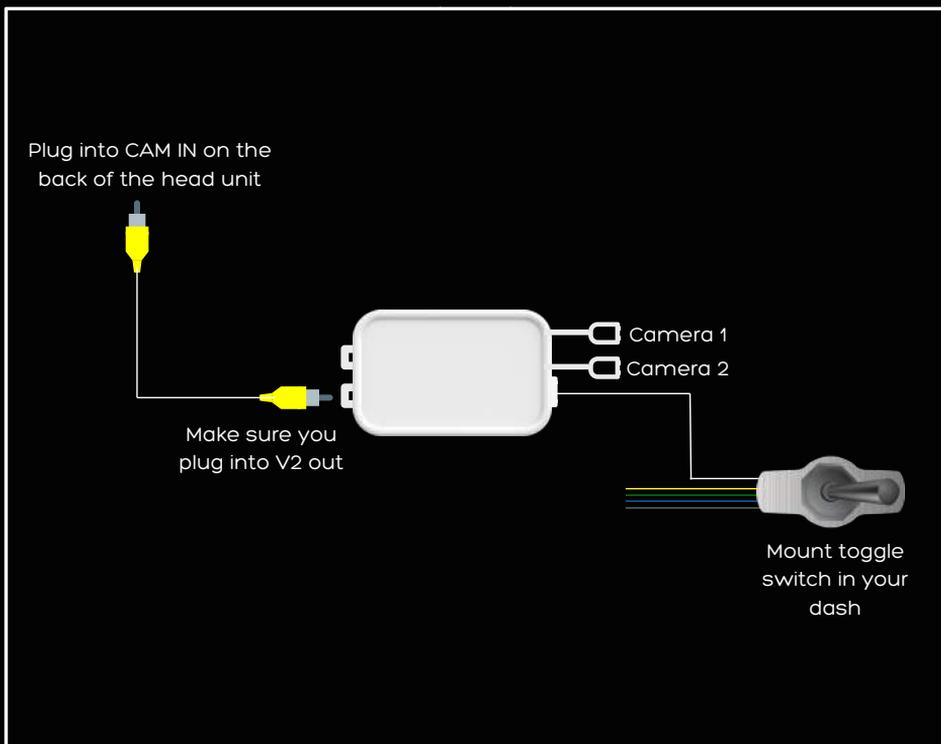

Press the return **touch  
panel** button to change  
to caravan camera

[Back to contents](#)

# 3 CAM SETUP W/ CTRL BOX

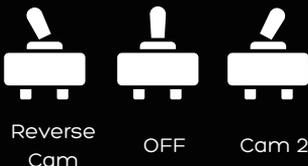

FRONT CAMERA, CAR REVERSE CAMERA & CARAVAN CAMERA

1. Plug your front camera into F-Cam
2. Plug your 2 additional cameras into the control box and connect V2 out to CAM-IN

## Wiring:

Yellow	-----	ACC+
Green	-----	Reverse Light Positive+
Blue	-----	Reverse Trigger (orange w/ black stripe)
Black	-----	Ground

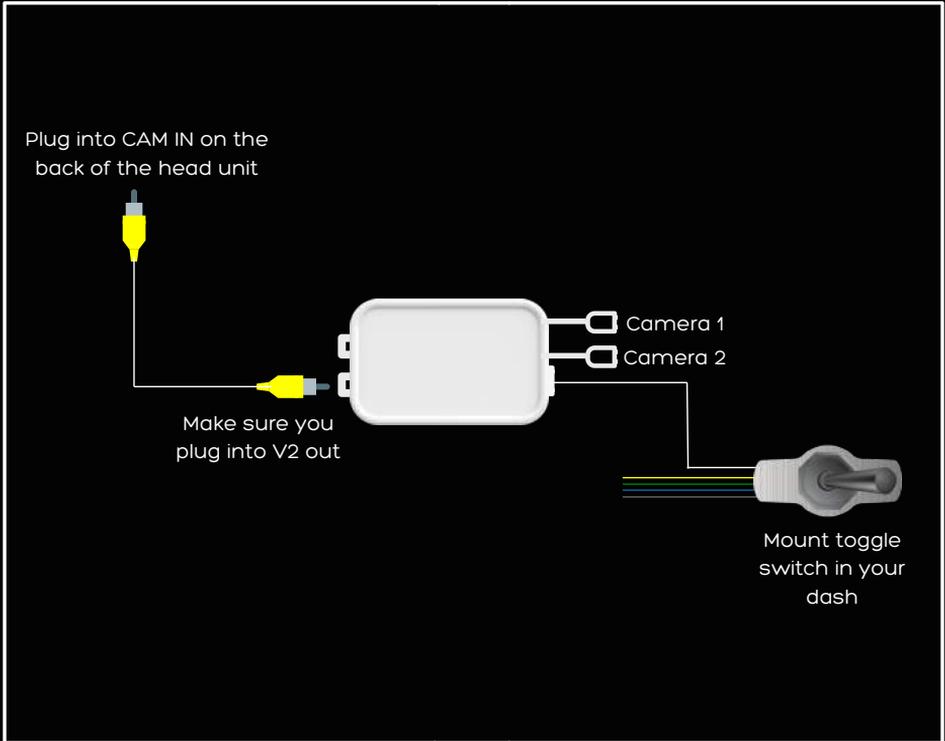

- The front camera will activate when the CAM app is selected on the head unit
- Reverse Camera will activate when in reverse and the toggle switch is activated
- The Caravan Camera can be activated anytime by activating the toggle switch in the opposite direction.

[Back to contents](#)

# 3 CAM SETUP W/ CTRL BOX

## CAR REVERSE CAMERA & DUAL CAMERA ON THE CARAVAN

1. Plug your 45° dual camera lens camera into F-Cam
2. Plug your 2 additional cameras into the control box and connect V2 out to CAM-IN

### Wiring:

Yellow	-----	ACC+
Green	-----	Reverse Light Positive+
Blue	-----	Reverse Trigger (orange w/ black stripe)
Black	-----	Ground

Reverse  
Cam

OFF

120° cam  
lens

- The 45° lens will activate when the CAM app is selected on the head unit
- Reverse Camera will activate when in reverse and the toggle switch is activated
- The 120° lens can be activated anytime by activating the toggle switch in the opposite direction.

# TOYOTA HARNESSSES

To assist you in identifying the appropriate Toyota harness for your Head Unit, please refer to the image below that corresponds to your specific harness and the corresponding instructions.

## Model No. POL0141

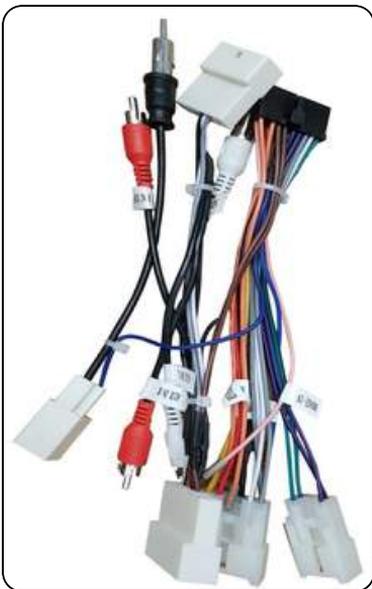

- This connector is designed exclusively for primary power and speaker connections.
- Insert it into the ISO harness, a component typically included with the Universal Maxx & Universal Luxx, to ensure seamless integration.

---

## Model No. KD06229 (No CANBUS module)

- Included in the Toyotaluxx, 70Maxx, and N70Maxx and offered as an optional upgrade for universal head units.
- Classified as a universal Toyota harness, it seamlessly connects with various Toyota vehicles.
- Connection features:
  - Primary power integration
  - Speaker compatibility
  - Steering wheel control support
  - Built-in radio antenna for applicable Toyota models
- Note: Depending on your vehicle, not all plugs may be utilised.
- Please be aware that this harness does not support factory camera retention.
- The absence of a CANBUS module means that steering wheel controls must be programmed manually
- Connect the reverse trigger wire to a reverse trigger source, either within your Toyota plug or from your reverse lights.

[Back to contents](#)

70 Maxx

ToyotaLuxx

N70 Maxx

Can also be an Optional Extra for the following units:

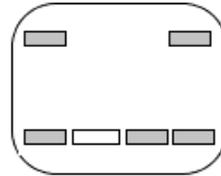

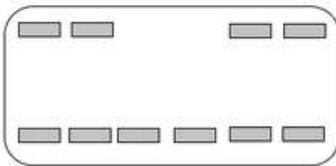

Universal Maxx

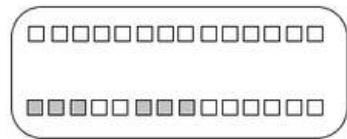

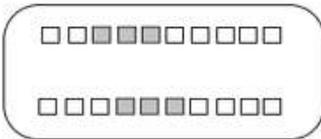

Universal Luxx

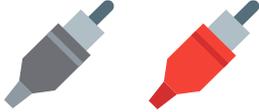

## Main Power and Speakers

## Steering Wheel Controls

	<p>Radio Antenna Adaptor</p>
	<p>Individual wires</p> <p>Orange with black: Reverse Trigger  Pink: Handbrake  Blue with white: Amp Control</p>
	<p>Red &amp; White RCA</p> <p>Applicable to some models</p>

Model No. KD06229

**Model No. KD01040**

- Toyota harness typically included with:
  - 200 Maxx
  - PradoMaxx14
  - Prado Maxx 18
- Optional extra for Toyota harness with factory cam retention for specific models.
- Covers:
  - Power
  - Speakers
  - Steering wheel controls
  - Factory camera retention (some Toyota models)
  - Radio antenna adaptor
  - CANBUS module (communicates with the vehicle, powers reverse trigger and SWC without manual programming)
- Note: Depending on your model, not all plugs will be used.

200 Maxx

PradoMaxx18

PradoMaxx14

Can also be an Optional Extra for the following units:

Universal Maxx

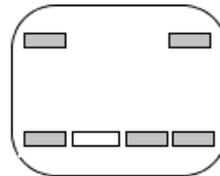

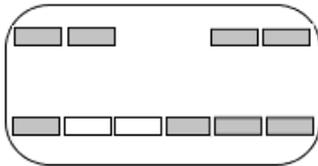

N70 Maxx

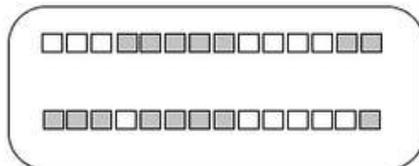

Universal Luxx

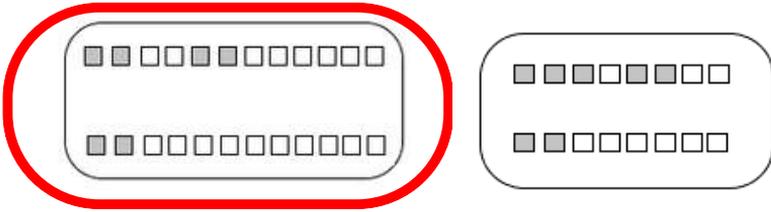

## Main Power and Speakers

Reverse Trigger, Handbrake, Steering Wheel Controls

# Factory Camera

- The 6-pin plug is typically used for the factory camera.
- After connecting the factory camera plug into the harness, remember to connect the corresponding CAM IN RCA into Plug I.
- The harness recognises the camera connection, but the head unit needs the above additional step for your factory camera to display on our head unit.

CAM IN - on main power harness

Plug I: CAM IN - from back of head unit

To view the pin configuration please [click here](#)

	<b>Radio Antenna Adaptor</b>  Connect the white plug to the Factory Radio Antenna Plug, and insert the 1 din connector into the back of the head unit
	<b>Individual wires</b> Blue with white: Amp control Black: Steering wheel control ground Brown: Key 1 Brown with black: Key 2
	<b>Red &amp; White RCA</b>  Retain AUX (if applicable)

**CANBUS Module**  
Controls different features

- Reverse trigger
- Steering wheel controls
- Display vehicle information

**Factory USB Retention**

Insert the adaptor into the back of the factory USB connector, and then connect it to one of Polaris USB ports using Plug F

## Model No. KD01028

- Toyota harness typically is an optional extra with the following units if your vehicle is 2020+ :
  - HiluxMaxx
  - Prado Maxx 18.
- Covers:
  - Power
  - Speakers
  - Steering wheel controls
  - Factory camera retention
  - Radio antenna adaptor
  - CANBUS module (communicates with the vehicle, powers reverse trigger and SWC without manual programming)
- Note: Depending on your model, not all plugs will be used.

Can be an Optional Extra for the following units:

PradoMaxx18

HiluxMaxx

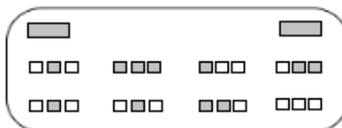

Universal Maxx

Universal Luzz

Main Power, Steering Wheel Controls, etc.

## Illumination, Ignition IN, Factory Reverse Camera

- After connecting the factory camera plug into the harness, remember to connect the corresponding CAM IN RCA into Plug I.
- The harness recognises the camera connection, but the head unit needs the above additional step for your factory camera to display on our head unit.

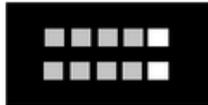

CAM IN - on main power harness

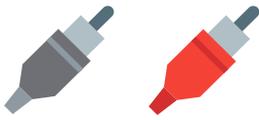

Plug I: CAM IN - from back of head unit

## Speakers

	<p><b>Individual wires</b></p> <p>Orange with black stripe: Reverse Trigger  Black: SWC Ground  Brown: Key 1  Brown with black stripe: Key 2</p>
	<p><b>Red &amp; White RCA</b></p> <p>Retain AUX (if applicable)</p>
	<p><b>CANBUS Module</b></p> <p>Controls different features</p> <ul style="list-style-type: none"> <li>• Reverse trigger</li> <li>• Steering wheel controls</li> <li>• Display vehicle information</li> </ul>
	<p><b>Factory USB Retention</b></p> <p>Insert the adaptor into the back of the factory USB connector, and then connect it to one of Polaris USB ports using Plug F</p>

# 2010+ 79 SERIES NOTES

- When removing the original fascia, cut off 4 lugs (Figure A), which are unnecessary for reinstallation (applicable to 70Maxx only)
- The 79 series includes its own Antenna Adaptor (refer to [page 24](#) for optimal radio reception).
- If installing a camera, wire the reverse trigger (see Figure B).
- In case of wiring harness stock shortage, we'll substitute it with an Polaris POL0141 Toyota wiring harness if you do not have steering wheel controls.

Figure A.

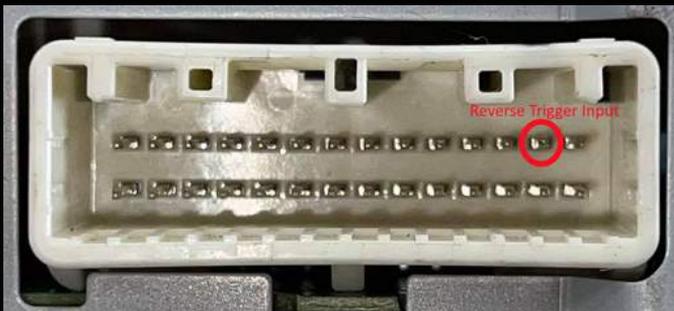

Figure B.

Once you have located this pin, attach the reverse trigger wire from the main power harness to the wire that attaches to this pin

# 2010+ 79 SERIES NOTES

- The 79 series comes with a factory-installed Radio Antenna Adaptor, rendering the additional factory antenna adaptor unnecessary. Locate the factory radio antenna adaptor, unplug it, and you'll notice it has a standard 1 DIN radio connector. Simply plug this connector into the back of the 70 Maxx, as illustrated in Figures C and D.

Unplug factory radio antenna adaptor

Figure C.

Plug the factory 1 DIN radio antenna plug into the back of the 70 Maxx

Figure D.

If you plug the Polaris Radio Antenna Adaptor into the Factory Antenna Adaptor, the radio reception will be poor.

# 2010+ 79 SERIES NOTES

- Factory Brackets may need to be filed down for Toyota Luxx (See Figure E).

File down section highlighted in Red

Figure E.

## TOYOTA HILUX 2015+ (HILUX MAXX)

- If you observe that the reverse trigger remains active even when the car is not in reverse gear, locate the black plug along the Reverse trigger wire and disconnect it
- There are two harness options for the Hilux Maxx. The KD01040 is compatible with models from 2015 to 2020, while the KD001028 is designed for the 2020 and later Hilux. If your original head unit features Carplay/Android Auto, you will require the 2020+ harness (KD001028). The 2020 model marked a transition, and this guideline helps determine the appropriate harness for your vehicle
- The 2015-2020 harness is a universal Toyota harness which means you may have leftover plugs that are not required to be used in your model.

[Back to contents](#)

# TOYOTA PRADO 2014-2017

## (PRADOMAXX14)

- If you find that the reverse trigger stays active when the car is out of reverse gear, there is a black plug in the middle of the Reverse trigger wire. Find this plug and unplug it.
- The included harness is a universal Toyota harness which means you may have leftover plugs that are not required to be used in your model.
- You will need to attach the new Hazard switch to your OEM hazard switch panel, please see pictures below.

New hazard switch is located in the satchel bag with all of the cables

Release the keyways to release the OEM Hazard switch.  
Attach the new Hazard switch to the OEM switch panel

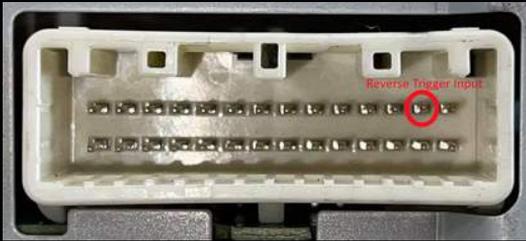

Remount the switch into the fascia panel & don't forget to plug the cable back in for the Hazard switch.

# TOYOTA PRADO 2018+ (PRADOMAXX18)

- There are two harness options for the PradoMaxx18. The KD01040 is compatible with models from 2015 to 2020, while the KD001028 is designed for the 2020 and later Prado. If your original head unit features Carplay/Android Auto, it is recommended to use the 2020+ harness (KD001028). The 2020 model marked a transition, and this guideline helps determine the appropriate harness for your vehicle.
- The 2015-2020 harness is a universal Toyota harness which means you may have leftover plugs that are not required to be used in your model.

# GENERAL TOYOTA NOTES

- If installing a camera and your harness has no CANBUS module wire the reverse trigger (see Figure F).
- Some older models may not have this pin, if this is the case, wire the reverse trigger to your reverse lights.

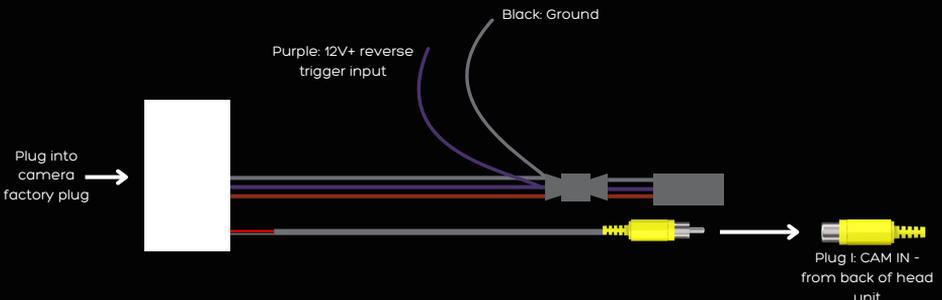

Once you have located this pin, attach the reverse trigger wire from the main power harness to the wire that attaches to this pin

Figure F.

- If your harness lacks a CANBUS module, manual programming is required for your steering wheel controls.
- If your harness includes a CANBUS module, there's no need for steering wheel control programming.
- If your harness has a CANBUS module and you're installing a universal head unit, ensure to adjust the CANBUS module setting in the factory settings to the correct configuration (refer to [page 34](#) for details)

## TOYOTA CAMERA RETENTION HARNESS

POLTY04 & POLTY02

[Back to contents](#)

# UNIVERSAL MAXX UNIVERSAL LUXX

The Universal Maxx and Luxx come with a universal ISO wiring harness.  
There are a few options to turn the units into a plug\_n\_play setup:

**Add a basic Aerpro Harness  
to suit your vehicle**

This plug will only cover power and speakers.

---

This type of Aerpro harness suits vehicles with steering wheel controls.

You will also require an Aerpro **APUNIP2** harness for steering wheel controls.

See [Page 32](#) for the wiring diagram

---

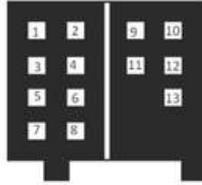

Purchase a Polaris Wiring loom if available for your vehicle

**[Back to contents](#)**

[Back to contents](#)

- In most cases, basic Aerpro ISO harnesses typically lack steering wheel control wires, except for the APP091.
- If your vehicle has non-CANBUS-controlled steering wheel controls and you're using an Aerpro harness, you'll need to hardwire Key 1, Key 2, and Ground from our ISO harness into the corresponding steering wheel control wires in the vehicle. Afterward, manual programming of the steering wheel controls will be necessary

# UNIVERSAL MAXX UNIVERSAL LUXX

You will still need to program in your steering wheel controls via Wheelkey study, please see video [page 59](#)

[Back to contents](#)

# UNIMAXX NOTES

- The Universal Maxx double DIN chassis is designed to attach to most vehicles' Factory brackets.
- Certain vehicles may require a fascia to fill the gap around the double DIN chassis.
- Check our list of popular fascia/installation kits [here](#) or check out [www.aerpro.com](http://www.aerpro.com) and we can order parts in for you.
- Caution against frequent detaching and attaching of the screen to prevent potential damage and prolong screen life.

## ATTACHING THE SCREEN

- 1.Plug the cable from the double DIN chassis into the back of the screen mount, ensuring correct alignment by matching up the locating pin.
- 2.Hold the screen and insert the mount into the opening on the double DIN chassis.
- 3.Listen for a click, indicating that the mount has securely attached. If no click is heard, it has not attached correctly
- 4.If the screen is not securely locked in place, it may be due to the ribbon hindering the click-in action.
- 5.Detach the screen, reposition the ribbon to clear the way, and attempt reattachment.

# POLARIS HARNESS WITH CANBUS MODULE

If you are fitting one of these harnesses with a CANBUS module to a universal unit, please make sure your CANBUS settings have been set:

Go into Settings > Car settings > Factory settings > type in 126 > select CANBUS > Change Canbox settings

KD01040:Hilux Harness 2015-2020: **2. TOYOTA/CAMRY/RAV4 (Simple)**

KD001028 Hilux Harness 2020 +: **2. TOYOTA/CAMRY/RAV4 (Simple)**

KD06229 70 Maxx Harness: **2. TOYOTA/CAMRY/RAV4 (Simple)**

KD01040:200 MAXX Harness: **2. TOYOTA/CAMRY/RAV4 (Simple)**

KD00506 NP300 Maxx 2015-2019 Harness: **31. Nissan 2013 (Simple)**

KD4801 NP300 Maxx 2019 + Harness: **31. Nissan 2013 (Simple)**

KD19116 VW Maxx 2011-2016 Harness: **13. VW-GOLF7 (Simple, Raise)**

KD00502 VW Maxx 2017 + Harness: **13. VW-GOLF7 (Simple, Raise)**

KD00506 BT50 Maxx: **24. Mazda/BT-50 (Simple)**

KD00001 Holden Colorado with mylink: **11. GM/BUICK/CHEVROLET/OPEL (Simple)**

There are other CANBUS settings that you can also change like front door, rear door, etc.

In most cases if any vehicle information or steering wheel controls are the opposite way around you can select the corresponding setting and select change.

# UNILUXX NOTES

- The Universal Luxx double DIN chassis is designed to attach to most vehicles' Factory brackets.
- Some vehicles will require a fascia to fill the gap around the double DIN chassis. Please see [here](#) for a list of popular fascia/installation kits or head over to [www.aerpro.com](http://www.aerpro.com) to see which fascia/install kit suits your vehicle.
- Note: The fascia might require slight modification for the Universal Luxx to fit properly.
- If you've installed a caravan camera on the Universal Luxx, programming one of the touch panel buttons is required to switch to the caravan camera image when in reverse.

To achieve this, follow these steps:

1. Select Settings.
2. Navigate to Car Settings.
3. Choose Factory Settings.
4. Enter the password "126."
5. Select KEY.
6. Choose Touch Key Study.
7. Select Clear.
8. Touch the eject button; program short press as eject.
9. Touch the power button; program short press as power.
10. Touch the Home button; program short press as Home and program long press as the Return/back icon.
11. Touch the Volume Increase button; program short press as Volume Increase.
12. Touch the Volume Decrease button; program short press as Volume Decrease.
13. Select Save Exit.

Notes: The return/back icon looks like this: 

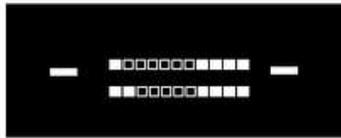

Now when you engage reverse, you can long press the home button to switch to the caravan camera.

# BT50MAXX

Fits: 2012-2014 XT, XTR & GT models  
2015-2016 XT model

Main power, Speakers, Steering Wheel Controls etc.

## Not Required In Australian Models

Located on the main wiring harness

	<p><b>Radio Antenna Adaptor</b></p> <p>Connect the Antenna plug to the Factory Radio Antenna Plug, and insert the 1 din connector into the back of the head unit</p>
	<p><b>Individual wires</b></p> <p>Blue: Amp Control Brown: Key 1 Brown with black: Key 2</p>
	<p><b>CANBUS module</b></p> <p>Controls different features:</p> <ul style="list-style-type: none"> <li>• Steering Wheel Controls</li> <li>• Reverse Trigger</li> <li>• Accessories power</li> <li>• Also has a plug coming off module to retain Factory Reverse Sensor noise (if applicable)</li> </ul>

## BT50 MAXX NOTES

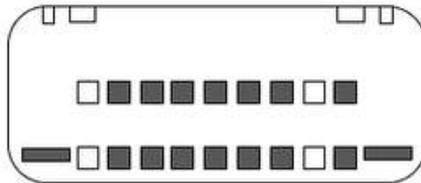

- Your steering wheel controls do not require wiring or programming. The CANBUS module comes pre-programmed for your convenience.
- If the unit fails to power up, or if it remains on with the key out of the ignition, please contact our technicians at 1300 555 514.
- In case your steering wheel controls aren't working, double-check the CANBUS module settings in Settings > Car Settings > Factory Settings > Passcode: 126 > CANBUS > Canbox Settings. Ensure it is set to Number 24: Mazda BT50 (Simple).
- Attach the clips removed from the original fascia panel to the BT50 Luxx fascia panel.
- The USB Retention cables are optional and not mandatory for use.
- Only the parts listed in the manual are required; if a part is not listed, it is not necessary for installation.
- If you encounter difficulty plugging the central lock and hazard button into the factory plugs, it may indicate incompatibility, especially if you own a 2015-2016 XTR or GT model.

# GUMAXX

There are 3 types of harness that come with the GUMaxx, please fit the one that matches your factory plug.

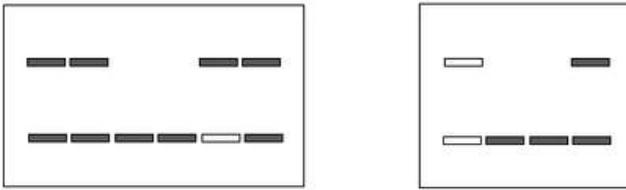

Model No. KD6001

This plug covers main power, steering wheel Controls, Illumination & Speakers

# HOLDEN COLORADO WITH MYLINK 2014-2016

Main power, Speakers, OEM Factory cam etc.

After connecting the factory camera plug into the harness, remember to connect the corresponding CAM IN RCA into Plug I.

The harness recognises the camera connection, but the head unit needs the additional step for your factory camera to display on our head unit.

CAM IN - on main power harness

# HOLDEN COLORADO WITH MYLINK 2014-2016 NOTES

- If you have factory reverse sensors, you can plug the speaker into the main harness to retain the sound.
- modify the CANBUS module setting on the head unit, follow these steps:
  - 1.Navigate to Settings.
  - 2.Go to Car Settings.
  - 3.Choose Factory Settings.
  - 4.Enter the passcode "126."
  - 5.Select CANBUS.
  - 6.Navigate to Canbox Settings.
  - 7.Ensure it is set to Number 11: GM/BUICK/CHEVROLET/OPEL.

	<p><b>Radio Antenna Adaptor</b></p> <p>Connect the Antenna plug to the Factory Radio Antenna Plug, and insert the 1 din connector into the back of the head unit</p>
	<p><b>Individual wires</b></p> <p>Pink: Handbrake Blue with white: Amp Control/ Ant power</p>

# ISUZU MAXX NOTES

- You will need to program your steering wheel controls, See [page 59](#)
- This harness will fit most of the 2012 - 2020 Dmax and the 2013 - 2021 MU-X however, there is one model that requires an adaptor. Any model fitted with a Clarion Navigation Factory head unit (see Figure G), will require an adaptor as the vehicle harness differs from the rest of the models.
- If you do not require the Antenna Adaptor, make sure that the Antenna control wire has power to it on the car side. The best way to do this is to wire up the Amp ctrl wire to the Factory Antenna Ctrl wire (See Figure H)

Figure G

Wire the Amp control wire  
to Radio Antenna Control

## VW MAXX NOTES

- Radio Antenna may differ in VW models. They may have dual or single. For Dual please see Figure J.

Figure J.

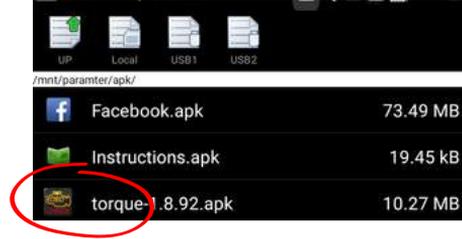

# OBDII Setup

## How to download the Torque app

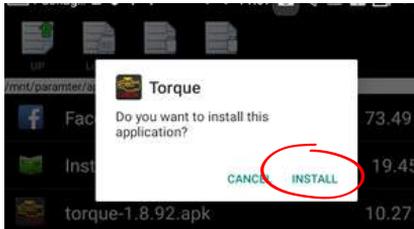

1. Select the APK installer app

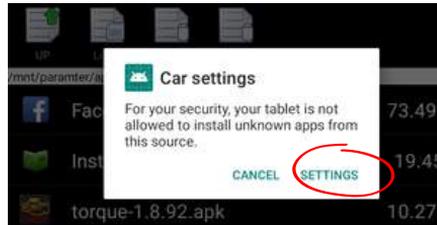

2. Select Torque in local storage

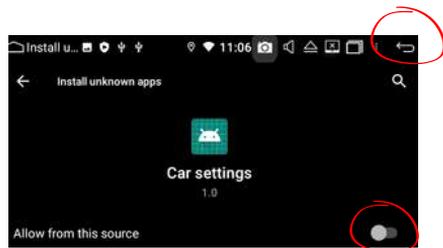

3. Install Torque app

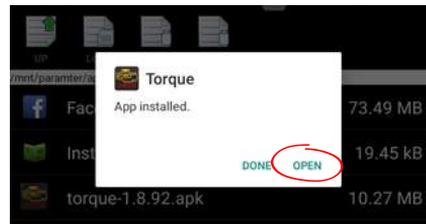

4. Settings

5. Allow and then select the return arrow to go back

6. Once installation is complete, select Done

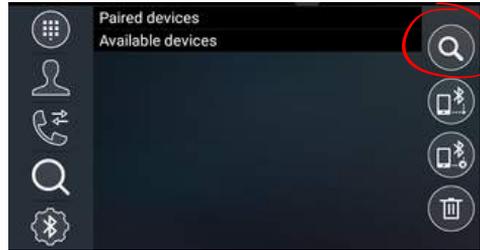

# Pair OBDII to Android headunit

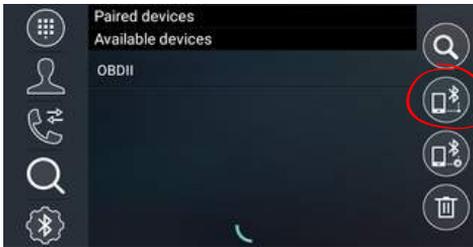

1. Select bluetooth on the main menu

2. Select the magnifying glass to search

3. Select OBDII and then pair (circled icon)

4. When successfully paired, OBDII will move into the paired devices section

# How to setup the Torque app

1. Open the Torque app and select continue

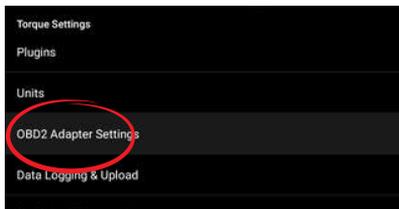

2. Select the Settings icon

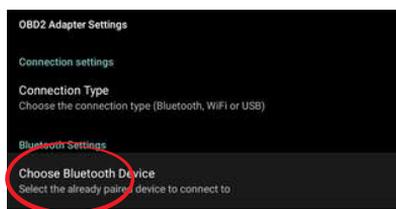

### 3. Select Settings

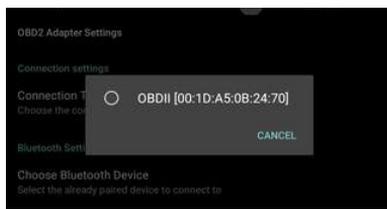

### 4. Select OBDII Adapter Settings

### 5. Choose Bluetooth Device

### 6. Select OBDII

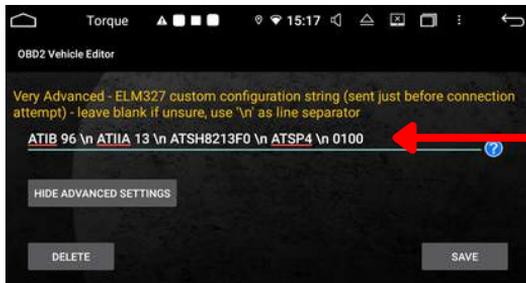

Press the return arrow and open Real Time Information

## Pre 2006 Toyota Vehicles

We have found that for most Toyota vehicles that are made prior to 2006, require a special code to be put into the Vehicle Profile settings.

1. Press the **Settings** icon
2. Select **Vehicle Profile**
3. Scroll to the bottom and select **Show Advanced Settings**
4. Scroll to the bottom and input the code in the field shown in the below photo:

Please enter exactly as shown (spaces, uppercase, lowercase etc)  
Press **SAVE** once finished

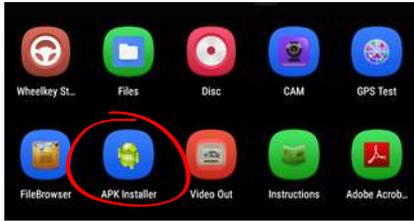

Code: ATIB 96 \n ATIIA 13 \n ATSH8213F0 \n ATSP4 \n 0100

# HELPFUL VIDEOS

Please see below some videos that may be helpful

How to pull apart a Dmax / MU-X Dash

How to pull apart a BT50 dash

How to pull apart a 79 series dash

[Back to contents](#)

# TROUBLESHOOTING

## **My Reverse camera isn't appearing when I put the vehicle in reverse.**

Unless you have a Polaris wiring harness (excludes Aerpro) with a CANBUS module, you will be required to wire up the **Reverse trigger wire** to reverse power. Please see the wiring diagram on [page 10](#)

## **The Radio Reception is poor**

For **79 series**, please see [page 24](#)

**For all other models:** If you do not need to use an Antenna Adaptor and your vehicle has the standard Radio Antenna connection (1 DIN), make sure the Antenna Control wire on the car side has power to it. You can wire up the **Amp control wire** on the Polaris harness to whichever pin controls the Antenna Control wire on the car side.

## **I have a Polaris wiring harness with a CANBUS module and my steering wheel controls aren't automatically working.**

Please make sure the head unit is set on the correct CANBUS setting: Settings > Car Settings > Factory Settings > Password: 126 > CANBUS > Canbox Settings:

- 1.Hilux Harness 2015 to early 2020: 2. TOYOTA/CAMRY/RAV4 (Simple)
- 2.Hilux Harness Post 2020: 2. TOYOTA/CAMRY/RAV4 (Simple)
- 3.70 Maxx Harness: 2. TOYOTA/CAMRY/RAV4 (Simple)
- 4.200 MAXX Harness: 2. TOYOTA/CAMRY/RAV4 (Simple)
- 5.NP300 Maxx Harness: 31. Nissan 2013 (Simple)
- 6.VW Maxx Harness: 13. VW-GOLF7 (Simple, Raise)
- 7.BT50 Luxx/Maxx: 24. Mazda/BT-50 (Simple)
8. Holden Colorado with mylink: 11. GM/BUICK/CHEVROLET/OPEL (Simple)

## **I have a Polaris wiring harness with a CANBUS module and my doors appear on the wrong side (Left Hand Drive).**

- 1.Settings > Car Settings > Factory Settings > Password: 126 > FUNC > Turn Rudder on
- 2.While you are still in the factory settings you can also go into CANBUS and change any settings in here if Rudder does not fix some of your vehicle information appearing correctly.

## **I have fitted a Universal Maxx and the touch screen is unresponsive**

- 1.Turn the vehicle off.
- 2.Carefully detach the screen and reattach it, ensuring a secure connection and double-checking the pins.
- 3.Turn the vehicle back on.
- 4.Use a small device to access the reset hole.
- 5.Hold the reset button until you see lights flashing around the buttons, then release.
- 6.The unit will undergo a cold boot, and the touch screen should become responsive.
